

# AODD PUMPS FOR PAINTS, INKS, & COATINGS MANUFACTURING

For every step in your process

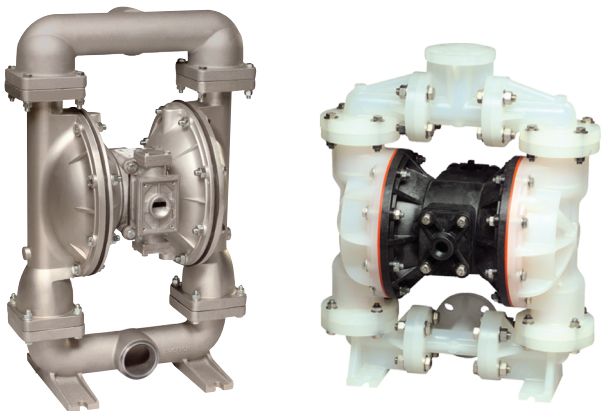

**SANDPIPER®**  
A WARREN RUPP, INC. BRAND

## Process Map for Paint Manufacturing

## Standard Duty Ball Valve Pumps

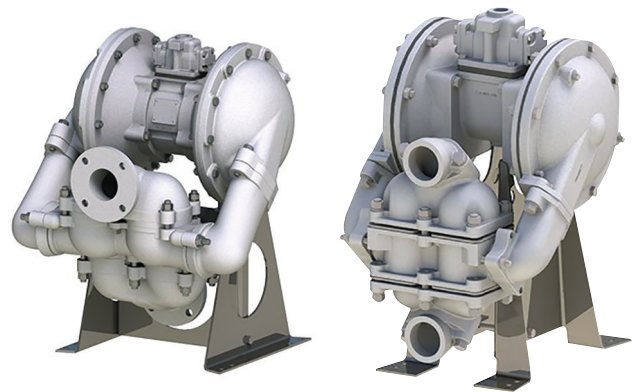

For reliable transfer in utility applications

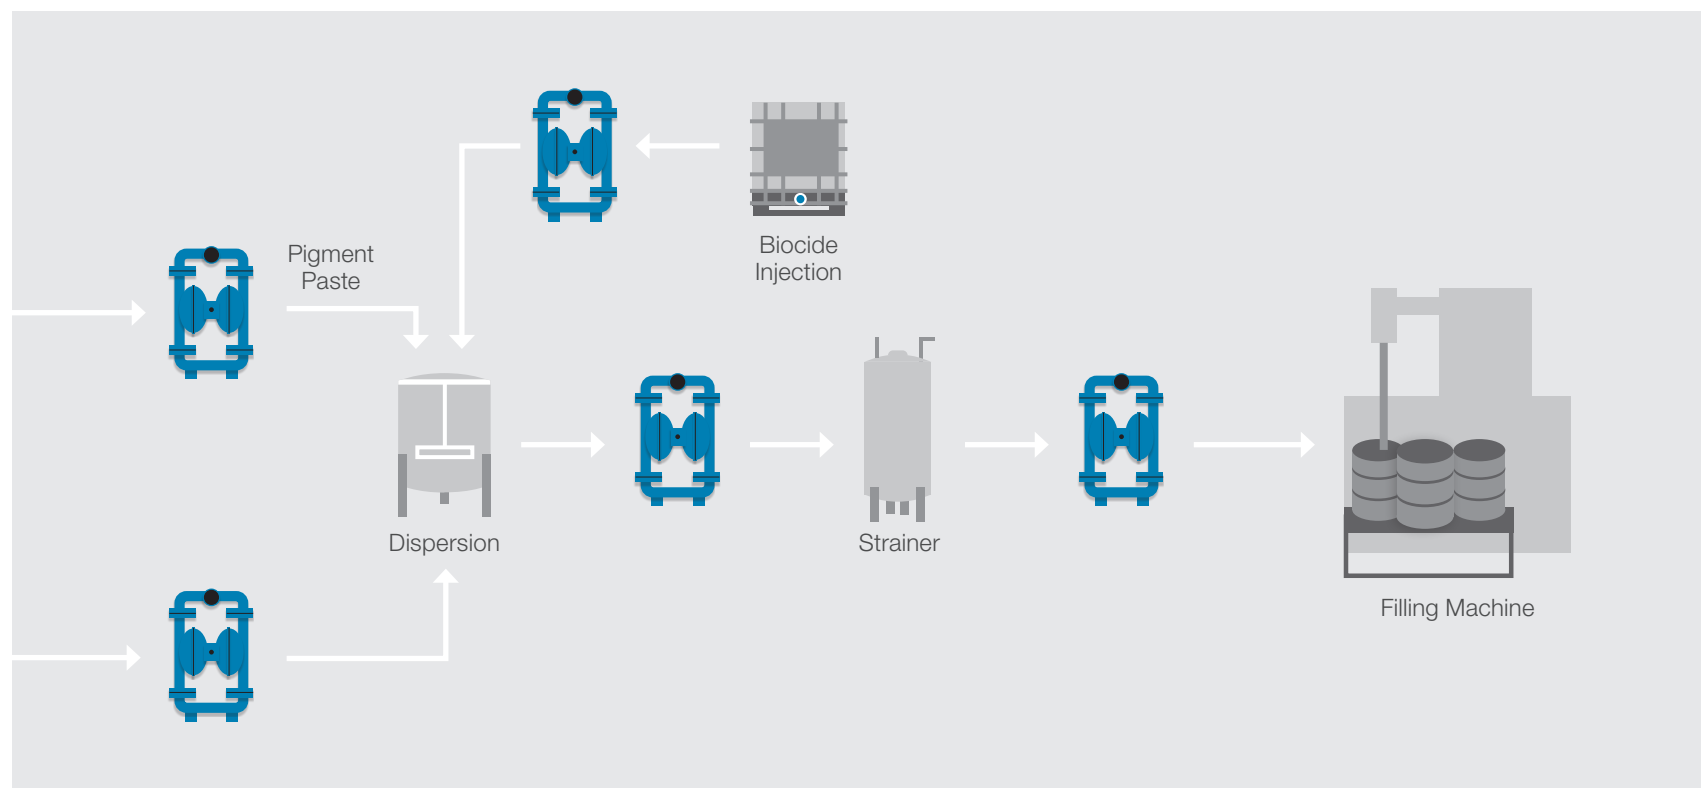

- Clear, clean fluids like water, oils, and solvents
- Variety of wetted materials including Stainless Steel, Aluminum, and Polypropylene
- 1/4" through 3" sizes with industry leading flow capacities and air efficiencies
- Exclusive Externally Air Distribution System (ESADS+) only found on SANDPIPER pumps

## Heavy Duty Ball Valve Pumps

For fluids containing settling or suspended solids and slurries

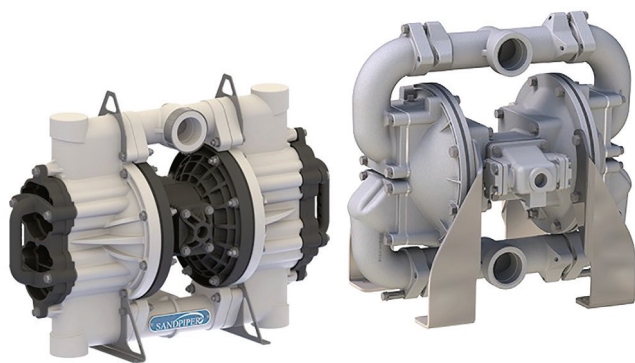

- Premix fluids with high concentrations of solids such as pigment
- Exclusive "down-ported" design allows efficient evacuation of solids
- Wetted materials include Stainless Steel and Aluminum
- 1" through 3" sizes with industry leading flow capacities and air efficiencies, especially with viscous fluids

## Heavy Duty Flap Valve Pumps

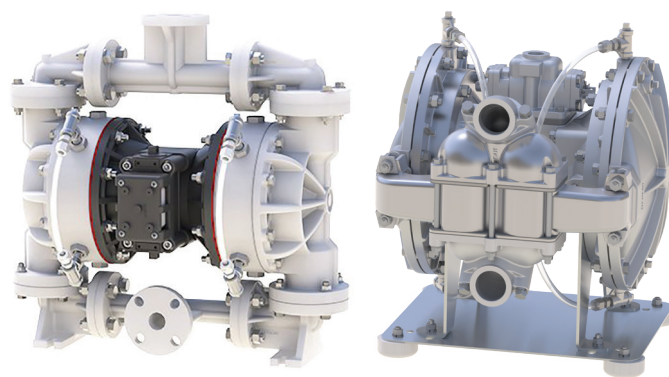

For fluids containing up to line-size solids

- Plant Interior and exterior sumps and dewatering
- Unique flap check valve design allows for passage of large solids
- Bottom discharge porting for gravity assisted drainage
- 1" through 3" sizes with a variety of wetted material options including Stainless Steel, Aluminum, and Polypropylene

## Containment Duty Ball Valve Pumps

For safe containment of hazardous fluids

- Excellent for hazardous chemicals such as biocides and ammonia
- Unique containment chamber with visual or electronic leak detection
- In case of a diaphragm rupture, allows pumps to operate until maintenance can be scheduled
- Available wetted material options include Stainless Steel, Polypropylene, and PVDF

**Most AODD pumps look the same but are not the same. Here is what makes SANDPIPER ideal for paint manufacturing.**

- Unique, Heavy Duty designs that excel in transferring viscous fluids, slurries, abrasives, and solids
- Exclusive containment duty designs for safe transfer of hazardous fluids
- Decades-Proven Air Distribution system that is guaranteed not to stall and reliably deadhead
- Best in Class flow capacities and air efficiency for maximum performance while minimizing energy usage
- Engineered for gentle, shear-free product transfer
- All-bolted construction for robust, leak-free performance
- Best in Class product deliveries – days instead of weeks
